### Automatic Mailer

PRESTASHOP 1.6 & 1.7

---

## # PRESENTATION

This addon allow you to send email to your clients when they buy a product from your shop. You also have the option de delay the email for some days. It can allow you to remind your clients to rate the product once they bought it.

### Features:

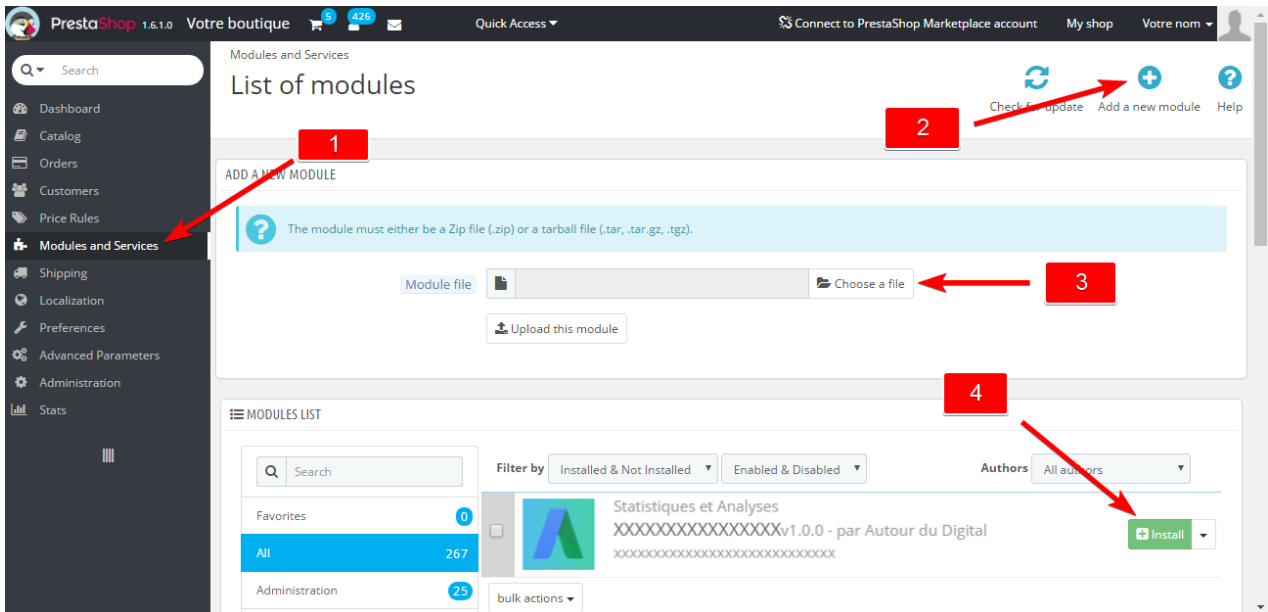

- ✓ Customizable email ( sender, object, content...)
- ✓ Send the mail once or for each order
- ✓ Condition to send the mail
- ✓ Number of days before sending the email

## # INSTALLATION – PRESTASHOP 1.6

**Step 1:** Download the latest version on PrestaShop.

**Step 2:** Login to your PrestaShop admin panel (Back office).

**Step 3:** Go to the "Modules" tab (1), click on the "Add a new module" button (2), select the downloaded module "brlautomaticmailer.zip" on your computer and click the "Upload this module" button (3). Finally click the "Install" button (4).

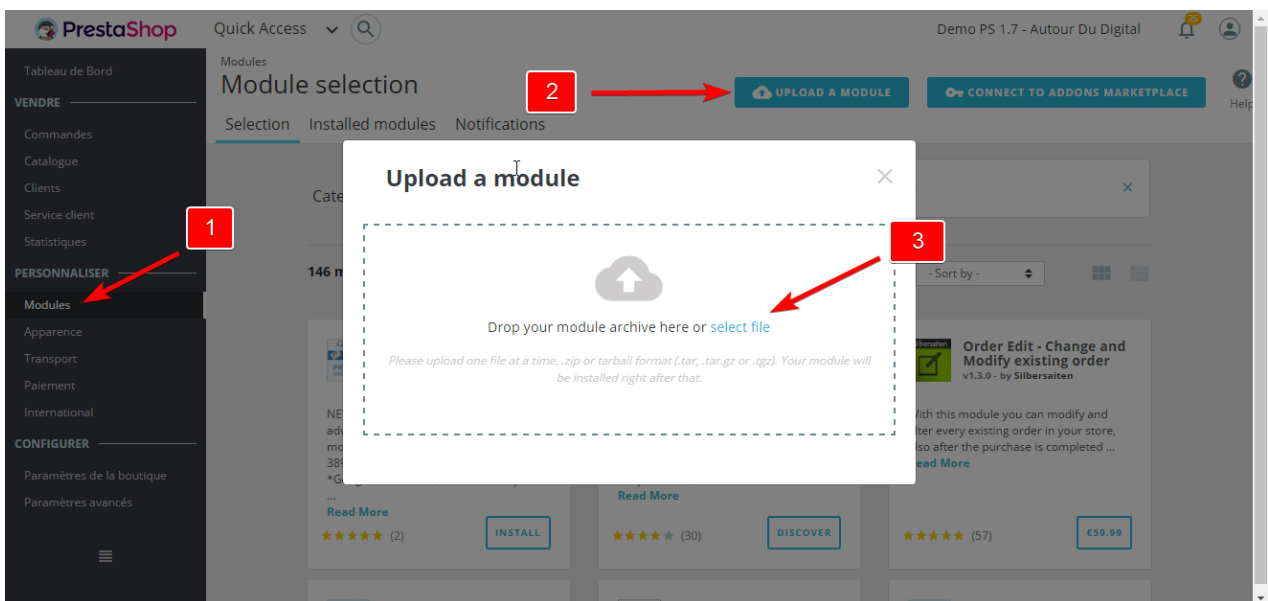

## # INSTALLATION – PRESTASHOP 1.7

**Step 1:** Download the latest version on PrestaShop.

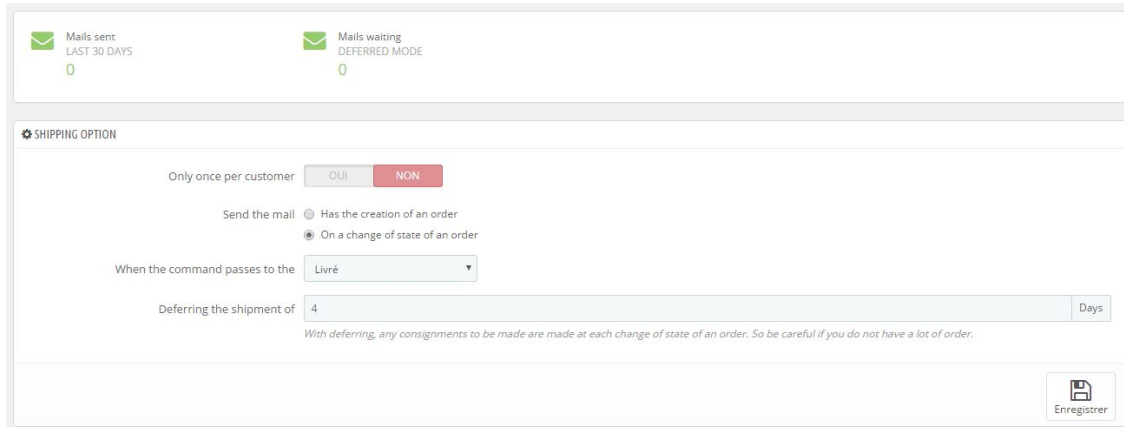

**Step 2:** Login to your PrestaShop admin panel (Back office).

**Step 3:** Go to the "Modules" tab (1), click on the "Upload a module" button (2), select the downloaded module "brlautomaticmailer.zip" on your computer (3).

## # CONFIGURE

Go to the "Modules" tab, search "Automatic Mailer" and click on the "Configure" button.

The screenshot shows the configuration interface for the Automatic Mailer module. At the top, there are two status indicators: 'Mails sent LAST 30 DAYS' with a value of 0, and 'Mails waiting DEFERRED MODE' with a value of 0. Below this is the 'SHIPPING OPTION' section. It includes a toggle for 'Only once per customer' set to 'NON'. The 'Send the mail' section has two radio buttons: 'Has the creation of an order' and 'On a change of state of an order', with the latter selected. A dropdown menu for 'When the command passes to the' is set to 'Livré'. A text input field for 'Deferring the shipment of' is set to '4' days. A note below states: 'With deferring, any consignments to be made are made at each change of state of an order. So be careful if you do not have a lot of order.' An 'Enregistrer' (Save) button is at the bottom right.

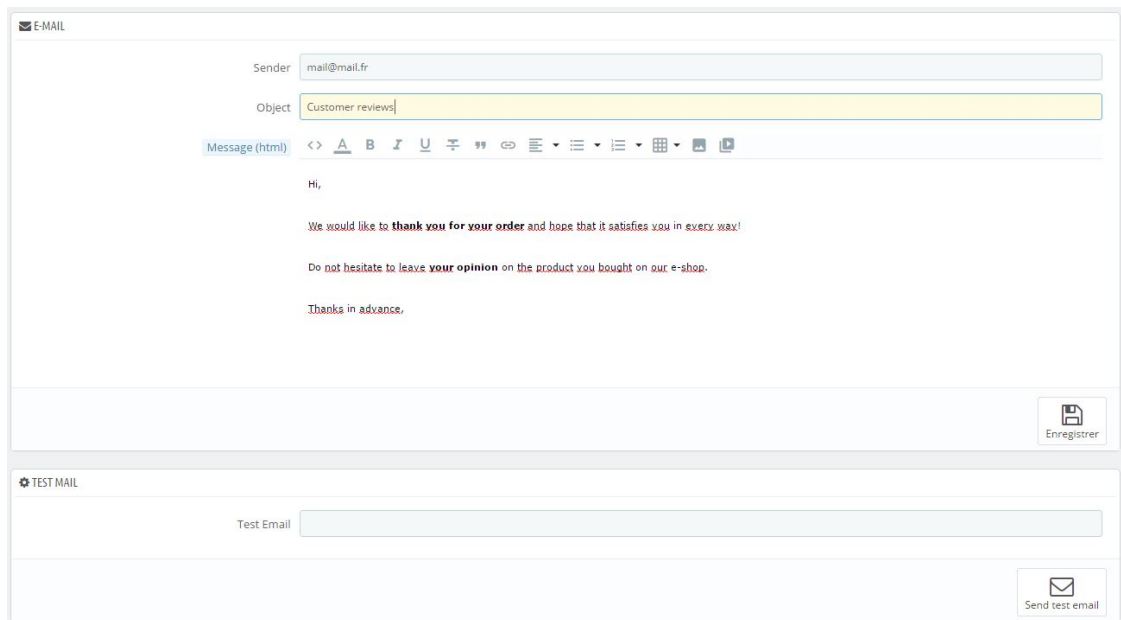

On this page, you have access to information about the last sent emails and the waiting emails. You also have access to the configuration panel.

The first option on yes will send an email to the client on his first command and won't send another one for another command. Else, it will send a mail to the client for every command he pass.

The 2nd option give you the choices to send a mail when a customer add a product to his cart or on a changing state of order (when the command is paid or when the product is delivered for exemple).

The 3rd option occur if the 2nd option is on 'On a change of state of an order'. It will allow you to choose the state that will trigger the email sending.

The last option allow you to delay the email sending. If you don't want to delay it, just put 0 in it.

The screenshot shows the email configuration and testing interface. The top section is titled 'E-MAIL' and contains fields for 'Sender' (mail@mail.fr) and 'Object' (Customer reviews). Below these is a rich text editor with a toolbar and a preview of the email content. The preview text is: 'Hi, We would like to thank you for your order and hope that it satisfies you in every way! Do not hesitate to leave your opinion on the product you bought on our e-shop. Thanks in advance.' An 'Enregistrer' (Save) button is at the bottom right. The bottom section is titled 'TEST MAIL' and contains a 'Test Email' input field and a 'Send test email' button.

You also are able to customize the email and test it on your personal adress.

## # LIMITATION OF LIABILITY

It is your responsibility to do all the necessary tests to ensure that the module operates as desired.
