

Admin Product Filter and Extra Columns

Description

Fast and flexible ajax filter for products in Back Office.

Search products in your catalog by lots of filters and display new columns in the product list - brand, suppliers, features, attributes and much more.

Installation

To install the "Admin Product Filter and Extra Columns" module:

1) Install the module's archive in the Back office: go to the Modules page and click the "Add a new module" button. Then follow instructions.

OR

Unzip (decompress) the module archive file and, using your FTP software, place the folder in your PrestaShop /modules folder.

2) Go to Back Office >> Modules.

3) Locate the "Admin Product Filter and Extra Columns" module in the list, scrolling down if necessary.

4) In the row for the "Admin Product Filter and Extra Columns" module, click Install.

5) Locate the module again. Click >> Configure.

Admin Product Filter and Extra Columns

v1.0.0 - by
PrestaSite

Fast and flexible ajax filter for products in Back Office.

Configure

Quick Guide

1. After the module installation simply navigate to the Products page.
2. You will see new block "Product filter". It already displays a few basic filters.

3. Try to use any filter input. The module will load results by ajax and update the product list.
4. You can also change the filter list. Click the button "Edit filters" at the top right corner of the filter block.
5. You will see a list of inactive filters. Drag and drop any filter to the active list to use it.
6. Also you can see there a list of columns. By clicking at the corresponding checkbox you can show/hide any column in the product list.
